mohan-developer-portfolio.vercel.app Bengaluru, Karnataka, India

SUMMARY

Software Engineer with **5 years** of experience building scalable, reliable **fintech** and **enterprise products**. End-to-end ownership of complex, high-scale features with a focus on backend performance and robust system design using **Node.js**, **NestJS**, **C#/.NET**, **Angular**, **SQL/NoSQL**, and **AWS/GCP**, applying SOLID principles, design patterns, clean architecture, and AI-assisted tooling to accelerate delivery. Seeking **Software Engineer 3**, or **Full-Stack Engineer** roles within product-driven teams.

EXPERIENCE

Software Engineer 2

Lytix

08/2024 - Present Bengaluru, Karnataka, India

- Led technical direction and delivery of **2 customer-facing features**, influencing product roadmap and strategic priorities. Owned **data model** and **full-stack implementation**, enabling administrators to **control product behavior** across device fleets.
- Architected a **high-reliability enterprise audit system** across **9 modules**, leveraging Kafka for resilient event-driven data processing and ensuring zero data loss across **millions of user actions**.
- Independently diagnosed and resolved **SSO lockout issues** affecting **10%** of reported cases, shipping **production fixes under deadline** and documenting a long-term remediation plan.
- Designed an **asynchronous export pipeline** with **secure links** and background processing, enabling **1000s** of administrators to **download large files** without UI freezes.
- Built a Node.js worker-thread **batch processor** for **90M+ records**, surfacing anomalies and usage patterns from time-based comparisons.
- Delivered an **email-based reporting module** that reduced manual reporting time by **25%** for **adaptive content generation**.

Senior Consultant

JK Tech

04/2024 - 08/2024 Bengaluru, Karnataka, India

- Developed **optimized, scalable, modular code** for a **web application**, resulting in a **20%** reduction in bug reports, improving overall user experience, and **easy-to-debug** functionality.
- Decreased onboarding time for junior engineers by designing and implementing **6** structured training programs.
- Improved **third-party integration** efficiency by **30%** through technical design input and API/data-flow coordination.

Consultant

JK Tech

09/2022 - 03/2024 Bengaluru, Karnataka, India

- Engineered and integrated **7 core user-facing features**, improving application interactivity and decreasing user drop-off metrics.
- Implemented **Redis backed caching** and **batch-processing workflows**, improving application efficiency and response times by **70%** while reducing database queries, server load, and user-facing latency.
- Led the design, development, and maintenance of **11 REST APIs**, including end-to-end ownership of documentation and implementation, resolving critical bugs to improve system reliability.
- Crafted **complex SQL queries**, **optimized database performance**, and adeptly managed **data migration, backup, and restoration** processes, resulting in a **10% improvement** in overall **database efficiency**.
- Extensively employed the **JEST Framework** to create over **350+ unit tests**, validating user interfaces, backend processes, connectivity, and interactions with relational databases.

Associate Consultant

JK Tech

08/2021 - 08/2022 Bengaluru, Karnataka, India

- Completed comprehensive training across multiple technologies and applied it by building **2 small applications**.
- Contributed to a **Fintech** project for an international client alongside **5 cross-functional teams**, resolving **3+ technical issues**, and **supporting 2 POCs** that improved system performance and UI.

EDUCATION

Bachelor of Engineering: Electronics & Communication

Global Academy of Technology

08/2017 - 08/2021 Bengaluru, Karnataka, India

CGPA

8.28 / 10.00

SKILLS

Tools

Docker

Kubernetes

Git

Postman

Kafka

New Relic

CI/CD (GitHub Actions)

Runtimes, Frameworks & Languages

Node.js

NestJS

Express.js

Angular

.NET

JavaScript

TypeScript

HTML/CSS

C#

SQL

Python

Cloud Platforms

AWS

Google Cloud Platform

Databases

Postgres

MySQL

MongoDB

Redis

Concepts

OOP

SOLID

DOM

REST

Async Programming and Concurrency

Microservices

SSO (SAML)

Event-Driven Architecture

Domain-Driven Design

System Design Basics

Database Fundamentals

AWARDS

 DRIVE Award, Lytx Q1 2026 Recognized for consistently demonstrating a strong customer-focused mindset and delivering reliable, high-quality solutions with high-impact outcomes	 Customer Impact Recognition, Lytx Acknowledged for resolving a complex legacy issue affecting a critical functionality for a key client, showcasing strong ownership, technical expertise, and customer focus	 Note of Appreciation, JK Tech Appreciated for balancing project demands and dedication to the Professional Cloud Developer Certification
 Thank You Award, JK Tech Honoured for outstanding dedication and performance in serving the organization
