SUMMARY

Full-Stack Software Engineer with **five years** of experience building scalable, reliable software for **fintech** and **enterprise platforms**. Strong track record of owning features end-to-end, improving system performance, and solving complex engineering problems in fast-paced product environments. Experienced in backend-heavy full-stack development with **Node.js, NestJS, C#/.NET, Angular, SQL/NoSQL databases, and AWS/GCP**. Seeking **Senior Software Engineer, Backend Engineer, or Full-Stack Engineer** roles in product-driven teams.

SKILLS

Languages:	TypeScript, JavaScript, C#, HTML, CSS, Python, SQL, Shell scripting
Tools:	Docker, Kubernetes, Git, Postman, RabbitMQ, Kafka, New Relic
Frameworks:	Node.js, NestJS, Express.js, .NET, Angular, AngularJS
Cloud Platforms:	AWS, Google Cloud Platform
Databases:	Postgres, MySQL, MongoDB, Redis
Concepts:	OOP, SOLID, DOM, REST, Async Programming and Concurrency, Microservices, Event-Driven Architecture, Domain-Driven Design, System Design Basics, Database Fundamentals
Soft Skills:	Leadership, Strategic Thinking, Teamwork, Effective Communication

PROFESSIONAL EXPERIENCE

Software Engineer II | Lytx, Bengaluru, Karnataka, India

AUGUST 2024 – CURRENT

- Built and shipped **two end-to-end features** for a customer-facing Configuration platform — owned the **data model, implemented full cross-stack functionality**, and **delivered unit-test coverage** on both backend and frontend, enabling admins to **control product behaviour** across their entire **device fleet**.
- Architected an **enterprise-grade audit system** capturing **user actions across nine application modules** — built for high reliability at scale, supporting **millions of users** with zero tolerance for data loss.
- Led a POC for SSO lockout (**authentication & authorization**), diagnosed the root cause **independently**, and shipped a short-term production fix under a **tight deadline** while documenting the long-term remediation path.
- Designed an **async file download pipeline** with secure link generation and non-blocking background processing — eliminated UI freezes for **large data exports** and improved perceived performance significantly.
- Engineered a batch processing system analysing **90M+ records** using Node.js worker threads — surfaced usage patterns and flagged data anomalies through time-based comparisons, turning raw data into actionable signals.
- Built an **email-enabled reporting module** with adaptive content generation, integrating it directly into the existing notification infrastructure.

Senior Consultant | JK Tech, Bengaluru, Karnataka, India

APRIL 2024 – AUGUST 2024

- Developed **optimized, scalable, modular code** for a **web application**, resulting in a **20%** reduction in bug reports, improving overall user experience, and **easy-to-debug** functionality.
- Collaborated with third-party technology services, offering strategic insights to ensure smooth integrations.
- Balanced both **frontend** and **backend** tasks while **mentoring** and **guiding** junior team members, accelerating faster project delivery timelines.

Consultant | JK Tech, Bengaluru, Karnataka, India

SEPTEMBER 2022 – MARCH 2024

- Integrated **seven innovative features**, elevating the application's **user-friendliness** to new heights.
- Implemented **batch processing techniques** and **caching strategies** that resulted in an impressive **70% boost** in **application efficiency** and **response times**, **significantly reducing database queries** and **server load** while enhancing the overall user experience.
- Led the design, development, and maintenance of eleven REST APIs**, including end-to-end ownership of documentation and implementation, resolving **critical bugs** to improve system reliability.
- Crafted **complex SQL queries, optimized database performance**, and adeptly managed **data migration, backup, and restoration** processes, resulting in a **10% improvement** in overall **database efficiency**.
- Extensively employed the **JEST Framework** to create over **350+ unit tests**, validating user interfaces, backend processes, connectivity, and interactions with relational databases.

Associate Consultant | JK Tech, Bengaluru, Karnataka, India

AUGUST 2021 - AUGUST 2022

- Underwent comprehensive training in a wide range of technologies and illustrated the acquired knowledge by developing **two small applications**.
- Engaged in a **FinTech** project for an international client, collaborating with **five cross-functional teams**.
- Under the supervision of senior team members, **resolved more than three technical issues** by analysing and providing **feasible** and **optimum** solutions.
- Contributed to creating **two proofs-of-concepts (POCs)** that significantly improved the system's performance and user interface.

EDUCATION

Global Academy of Technology, Bengaluru, Karnataka, India

AUGUST 2017 - AUGUST 2021

Bachelor of Engineering: Electronics & Communication - 8.28/10 CGPA

CERTIFICATIONS

- Mastering AI-Assisted Development - **LinkedIn Learning**
- Professional Cloud Developer – **Google Cloud | November 2023 – November 2025**
- Career Essentials in Generative AI by Microsoft and LinkedIn - **LinkedIn Learning**
- IBM Data Science Professional Certificate – **Coursera**
- Java Full-Stack Course – **Pentagon Space**
- AWS Essentials – **A Cloud Guru**
- NodeJS - The Complete Guide – **Udemy**
- NestJS Fundamentals – **Official NestJS Course**

AWARDS & RECOGNITION

- **DRIVE Award, Lytx | Q1 2026:** Recognized for consistently demonstrating a strong customer-focused mindset and delivering reliable, high-quality solutions with high-impact outcomes.
- **Applauz AwardCo Recognition, Lytx:** Acknowledged for resolving a complex legacy issue affecting a critical functionality for a key client, showcasing strong ownership, technical expertise, and customer focus.
- **Thank You Award, JK Tech:** Honoured for outstanding dedication and performance in serving the organization.
- **Note of Appreciation, JK Tech:** Appreciated for balancing project demands and dedication to the Professional Cloud Developer Certification.

PROJECTS

Personal Portfolio | [Link](#)

React, Next.js, Tailwind CSS, Motion Framer

Crafted a personal portfolio project using **modern frontend technologies**, focusing on delivering an **exceptional user experience**. With a **responsive design**, ensuring compatibility across various devices, offering seamless navigation, and showcasing work effectively.

Currency Exchange Application | [Link](#)

Node.js, Angular, Material UI

Developed a **web application** featuring core functionalities such as **retrieving conversion rates** and **generating historical graphs** for specified currencies.

Library Management System - Backend Implementation | [Link](#)

Node.js, Express.js, MongoDB

Pioneered a **microservices-based backend architecture**, encompassing **user authentication, authorization, CRUD operations** on a **NoSQL database**, as well as **search** and **favourite addition** features, all managed by dedicated services.

Hand Gesture Recognition Using CNN

Python, Keras, Open CV

A simple hand gesture recognition model leverages **convolutional neural networks** to process snapshots, enabling seamless communication through sign language.
